

CIAM FAI
Report of the RC Soaring Subcommittee
Activities from April 2002 to January 2003

RC Soaring – (F3B/F3J) – Tomas Bartovsky

The RC Soaring Subcommittee has 27 members. To the Subcommittee there were invited all people who were appointed by their NAC's and who offered their E-mail addresses. The great number of members has the advantage that more people are directly informed about the discussed problems.

F3B

The discussion concerning the new winch testing procedure continues. There are no other serious problems in this class.

Unfortunately no organizer was found for the F3B European Championships this year and the one and only World Cup contest had to be canceled. On the other hand there were eleven second class international (Eurotour) contests organised in five countries.

F3J

The successful F3J World Championship at Lappeenranta Finland confirmed the popularity of this class. During this Championship a Technical Meeting with team managers was organized. Two main problems were discussed: 1) the reasons for new working time and 2) very near results of top pilots. Discussion continued and there were submitted two proposals for the Plenary Meeting Agenda to solve the first problem. The solution of the second problem was not found yet.

The World Cup serial with was successful in this class.

Tomas Bartovsky
Chairman, RC Soaring Subcommittee
